

## **Extracts from Decorations Vol 46**

### **A BREATH OF CONTEMPORARY AIR**

*The proud owners of this apartment at Upper East Coast Road had a very clear idea about the concept they wanted for their home and whom they wanted to implement it. Their previous residence had been designed by TDC & they had been exceedingly pleased with the result. So much so, in fact, that they unhesitatingly chose the company once more for the task of manifesting their dream home into reality.*

*Ceiling beams in the living room jutting out at awkward cornices played a determining factor in the allocation of space. Hence, the seating area in tandem with the locations the beams, the result being an “island unit” arrangement was created. The wall backing in the living room was created into a feature panel by means of silver leaf wallpaper patterned with grid lines to create a “clean cut” industrial look consistent with contemporary design. Accent colors and accessories create compelling visual contrast in the interior.*

*While the dominant color scheme is clearly white, deep browns and blacks dramatically ground the area. Wenge hues evoking the dark exotism of tropical woods are evident on the velvety sofa, cushion, and dining table, while dark sultry ebony line the top of the television console.*

*What happens once may not happen again a second time, it is said. But in the case of this apartment, the saying is certainly not the case.*
