

Dream Dwelling

BECAUSE EVERY INDIVIDUAL'S needs are different, every home should be uniquely designed to suit different tastes and preferences. Over the last 18 years, interior design firm TDC & Associates has helped a wide range of clients realise their ideal homes and offices by beginning with the most crucial step in designing a home, which is listening to the customer.

With an impressively varied portfolio including bungalows, penthouses, spas and showflats, TDC & Associates has consistently demonstrated its flair for creating designs which are beautiful and individualistic, yet functional and practical. Most of all, each plan is carefully adapted to the desires of the customers and enhances their standard of living.

The firm, which has provided its designing expertise to both local and regional clients, has won several awards since its inception in 1993. These include the Asia Pacific Residential Property Award for Best Interior Design Singapore in 2009 and 2010.

The team at TDC & Associates seeks to understand and share in the client's vision through in-depth discussions and offering a hands-on approach at the design stage. Then, they combine bold creativity, technical know-how and their knowledge of the latest trends in home design to bring each client's concepts to fruition. Naturally, the outstanding results speak for themselves.

For this high-rise apartment located in Orchard Road, the dining area became one of the focal points of the home, not least because of its unobstructed panoramic view of the shopping district. To make the most of the space and create a continuous flow with the view outside, the team at TDC & Associates conceptualised a dining area which is elegant, energetic, bright and airy.

In the day, glass sliding doors and floor-to-ceiling windows allow plenty of sunlight in, brightening up the dining space. The use of bold prints and finishes, juxtaposed with clean, strong lines, gives this space a stylish yet cheerful feel, matching the urban energy outside. Whether the occupants are sitting down to breakfast or simply enjoying a spot of afternoon tea, the dining area serves as a bright and uplifting spot for socialising.

On the other hand, the design team also ensured that the space would be just as appealing at nightfall. When the sun goes down, the muted palette of the dining space and the warm lighting give the dining area a cosy and intimate feel. Set against the twinkling city skyline, it provides the perfect setting for a relaxing evening meal or night-time heart-to-heart chats.

By paying close attention to detail, not just within a living space but in its surrounding environment as well, TDC & Associates is able to create spaces which suit homeowners' individual tastes and needs, and are aesthetically outstanding to boot.
