OASIS OF TRANQUILITY

A feeling of repose materialised immediately in the living room of this apartment in Goldhill Condominium. The engulfing serenity is achieved with a Zen color palette which includes, white, cream, beige and touches of brown.

The monochrome look is the highlight of the home in terms of aesthetics and also the crowning glory of the family's well-being as these colors offer a calming sense of space and balance to the atmosphere. With everyone in the family pushed for time, a low maintenance home is also essential. Designers of TDC & Associates kept the furnishings and lines simple so as not to clutter the space, inherent beauty, presented in the pure, unembellished forms of a white couch and low coffee table soothes the eye and spirit. Amazingly, the muted color scheme and simple furnishing did not prevent the house from exuding a sense of character.

Venturing slightly beyond the dining area, an inner sanctum of meditative charm comes into view. This quiet nook is a restorative haven, designed to effect a moody and poetic ambience, for reading good books, a cup of coffee and some peace and quiet.

The master suite is a scene of pure serenity and a beautiful extension of the rest of the house. Zen-like harmony is achieved by an indulgence in natural materials and natural light. Sheer drapes over the gorgeously huge window ensures a sense of lightness while playing on a maximum of natural illumination. With simplicity masking the careful thought and impeccable effort behind every decision in this project, TDC & Associates have carved out a heavenly oasis in the very heart of today's urban mania.
