

**Modern interior from Home & Apartment Trends volume 2217**

*Using a complete interior design service, which provides everything from the concept through to the finishing touches, saves a good deal of time. A designer who listens, notices the way you use a space and understands your personal style will create an interior that suits you.*

*TDC & Associates takes this approach to interior design, and says the right physical environment plays a key part in a person's personal comfort and professional success. The modern interior shown here was created by TDC for a family apartment. Contemporary materials have been used in a subtle way, giving the home a clean, classic style.*

*In the living room, a granite-textured feature wall has been used at the foot of the staircase. Acrylic cladding in a stainless steel frame separates the living room from the stairs. Special features like the sheer, tasseled canopy over the bed in the daughter's bedroom have been added to personalise each room to its owner.*
