Hilltop Haven

Set atop a hill amidst lush greenery and expansive views, this classic home is all serenity, calm and beauty. A palette of sand and shades of earthy browns were selected to complement the natural beauty of its exterior surroundings and bring a sense of warmth and comfort into the home. Being avid travellers, these colours provide a neutral backdrop for the homeowners to display their ever-changing collection of art pieces and collectibles.

Natural light streaming in through large windows in the living room give a burst of fresh energy and throws light on a pair of statuesque figures that draw your focal attention to their timeless beauty and artistry. Your eyes pleased, your mood lifted, you shift your focus to a lovely Baby Grand piano demanding to be played on the other side of the room.

Separating the living and the dining is a darkwood partition that graces the room with its bold aesthetic, yet multi-task as an anchor for the television. Large, leafy plants and gentle water fountains strategically placed around the home recall nature's simple beauty and add visual softness to contrast the clean lines and strong colours used throughout the home.

TIP
Group related display objects together for a more consistent theme.
